

The Krendl Machine Company's wireless remote system is compatible with our model KS200/ KS250/ KS260/ CTS wall spray truck systems, our model 500/ 1000/ 2000/ 2100/ 4200/ 5200 and our model 250A/ 450A with an ELU electrical system. The transmitter is hand-held with an internal antenna. Rated up to 300 feet, the wireless remote is practical to use at the job site. It is a three button system for independent control of the blower, (off/on), and blower and agitator combination mode (off/on). The Krendl Wireless Remote is preferred by the professional contractor.
