

KRENDL GV240XT BATT REMOVAL VACUUM

ONE MACHINE REALLY DOES EVERYTHING!

The Krendl GV240XT gas-powered, direct drive vacuum is your ideal insulation removal partner. This vacuum is designed to move all existing attic loose fill insulation, batt insulation, and new insulation materials from the job site and deliver it directly into a designated area such as a vacuum bag, dumpster, etc.

- 23hp Briggs & Stratton Vanguard Engine
- Electric starter
- Direct drive from motor to impeller, saving trailer space and money
- 4 wheels for support, 2 of which are caster style and lockable
- Low center of gravity with improved stability and reduced tipping hazard
- Larger 20" impeller to move more material faster
- 8" inlet and outlet ports, promoting fast and efficient material flow
- Outlet is angled downward to reduce risk of flying debris
- Beefier inlet hose with thicker walls to resist collapsing from increased force

Vacuum Specifications

Fan Type	Steel
Fan Size	18"
Inlet	8"
Outlet	6"

General Specifications

Dimensions	46" L x 30.5" W x 51"H
Weight	393 lbs

KRENDL GV240XT BATT REMOVAL VACUUM

One machine really does everything:

GV240XT Package

The Krendl GV240XT include:

- Krendl GV240XT 23hp Gas Vacuum, Direct Drive, Electric Start
- 175' of 6" hose (7 25' sections)
- 16 6" hose clamps
- 5 6" hose connectors
- 8" to 6" reducer (metal)
- 4.5' of 8" hose (12.5' section, 1 2' section)
- 4 8" hose clamps
- 50' of 4" hose (1 section)
- 2 4" hose clamps
- 6" to 4" reducer
- 4" Vacuum Pickup Tube
- Krendl Vacuum Defender (new enhanced drawer closure clamps)
- 8" to 6" reducer (plastic)
- NEW Krendl Flow Diverted enabling a quick switch from a full vac bag to an empty while the vacuum is running. It's lighter, simpler design takes up less space in the trailer, is easier to handle and even costs less than other brands.
